Operational Programme Prague -
the Growth Pole of the Czech Republic

**Are you a doctor from any
Prague health care insti-
tutes** (set up by Town City
Hall Administration or other
Prague districts?)

**Are you missing in
your clinical practi-
ce availability of
specific GENETIC
ANALYSIS?**

OIDIP
is the solution
(**O**pen **I**nterdisciplinary
Diagnostic **P**anel for
Prague)

Validation of Concept of Next Generation Sequencing in Improving the Routine Diagnostics of Genetic Diseases

- **based on massive parallel sequencing method (NGS)**
- **open multi-level analytical system**
- **complex differential diagnostics within one analytical run
(panel *OIDIP*)**
- **effective diagnostics of rare and genetically heterogenous
diseases (*clinical exom; exom*)**

**Help us select the most appropriate genes of
your interest!**
